5G

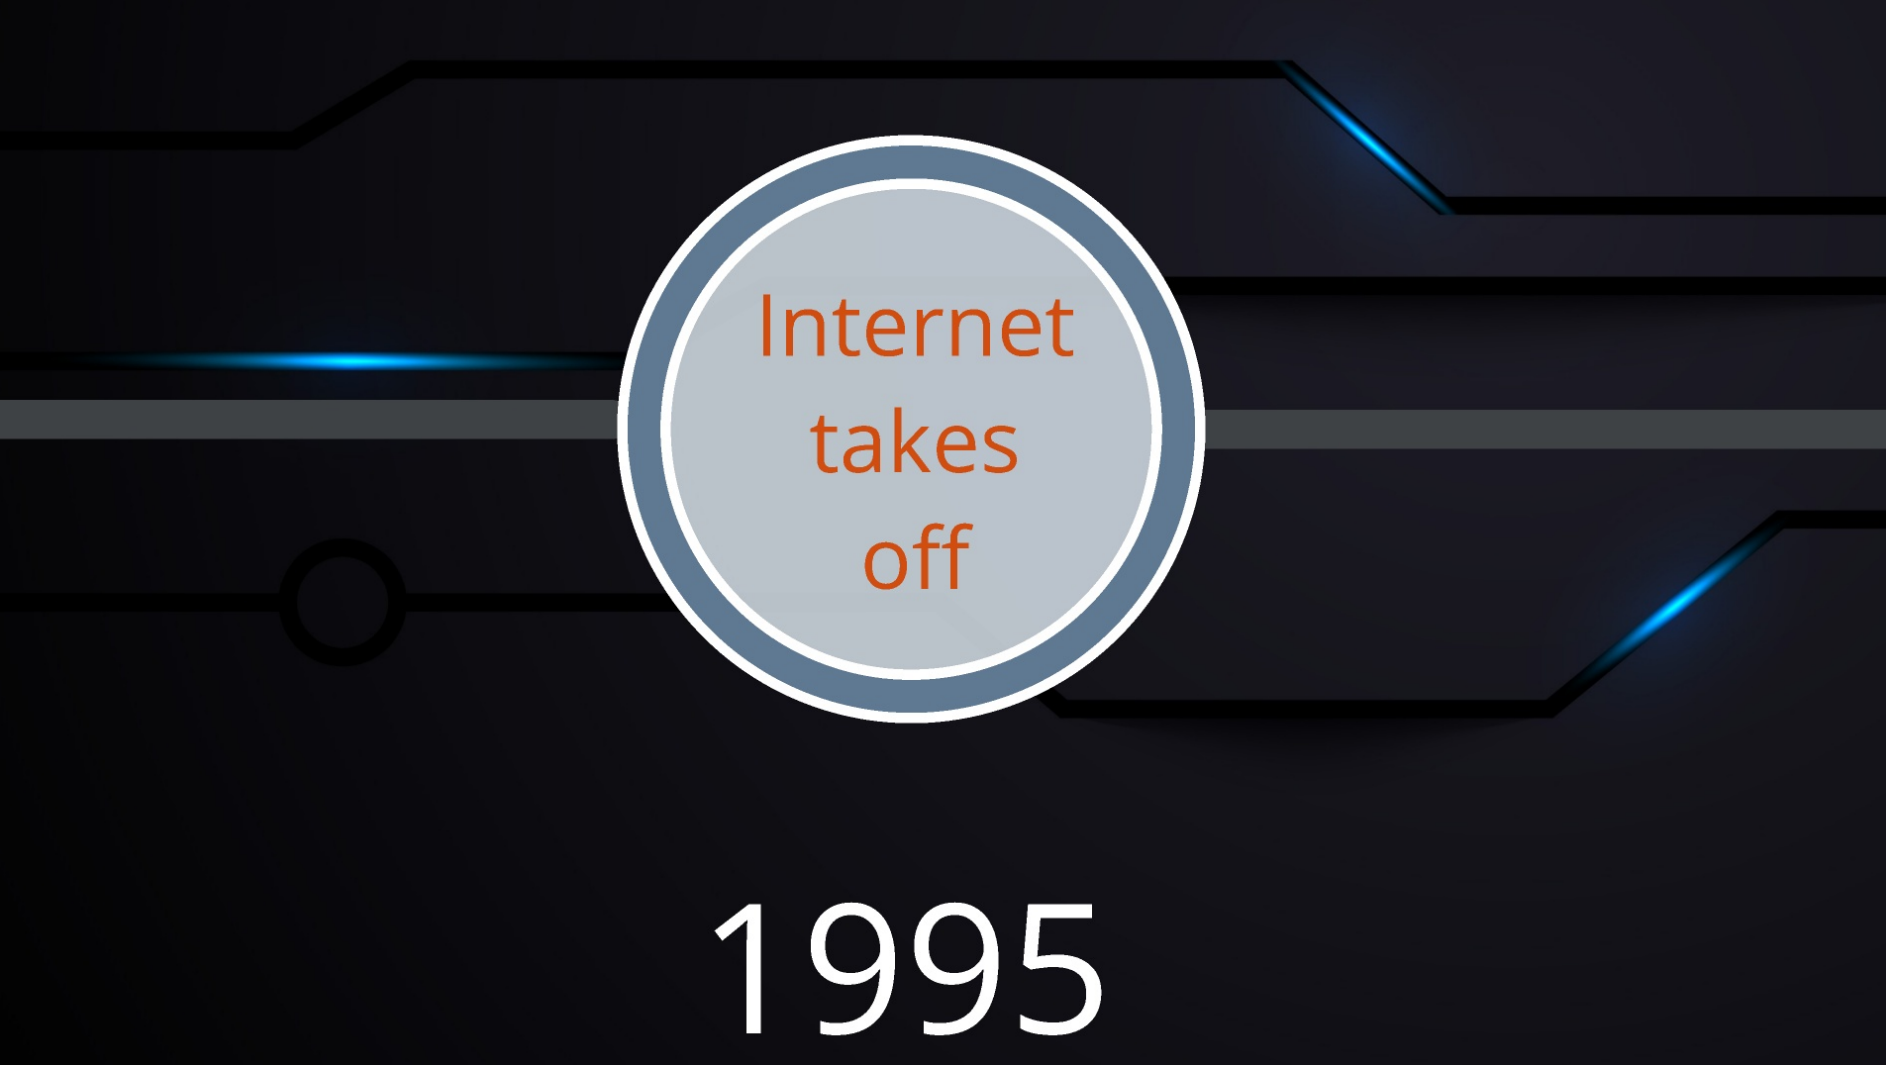
Networks without boundaries

Ulf Seijmer

What is 5G?

An intelligent network that can connect the world without boundaries.

1991



Internet
takes
off
1995

Internet of things

The Internet of Things has the potential to change the world, just as the Internet did. Maybe even more so. Kevin Ashton

1999

4G vs 5G

- Power consumption
- Latency

MASSIVE IoT

3000 sensors/day

2030

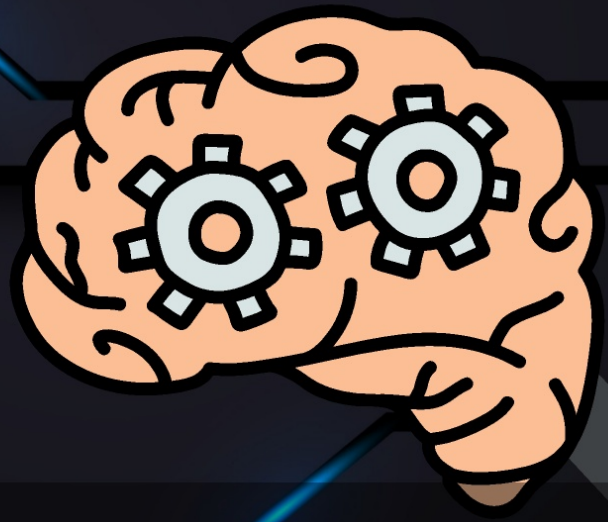
The key IoT ingredients

Monitor things

Connect with things

Find things

Your recipe



Open minded approach

IoT-trends coming

- Me of Things
- Health/environment
- Smart sensors with AI

2030

30 trillion devices

LET'S BREAK THE WORLD RECORD.

Who needs i(o)t?

Save the environment

Improve health

Save costs

IoT

will make the world

a better place
