DATA FROM SENSORS

Summary of the last 24 hours

Over the past 24 hours, important data was collected regarding battery level, temperature and humidity:

Conference room

Battery level: The battery level has consistently been 100%.

Temperature: The temperature has varied between 20.8°C and 22.3°C with an average of about 21.16°C.

Humidity: Humidity has varied between 16.5% and 24.5% with an average level of approximately 20.21%.

The office...

INTERPRET DATA

Specific recommendations

Conference room: Humidity should be monitored to prevent it from exceeding comfortable levels.

Office: Investigate the causes of the temperature variations and take measures to minimise them.

Office 2: Adjust the heating system or ventilation to reduce temperature and humidity variations.
